WIN/Gallup International's annual global End of Year survey shows that happiness is on the rise in the Americas

WIN/Gallup International, the world's leading association in market research and polling, has today published its 38th End of Year Survey exploring the outlook, expectations, views and beliefs of 64002 people from 65 countries across the globe.

Headlines

- 67% of people in the Americas say they are happy with their life, although just 27% believe that next year will be one of economic prosperity for their country;
- Fiji is the happiest country in the world (93%) while Iraq is the least happy (31%);
- Africa (75%) and Asia (63%) are the most confident that 2015 will be better than 2014, although citizens in the Americas have their doubts, with positive expectations dropping a percentage point to 42% vs last year and 30% expecting it to be the same and 24% worst;
- Just 12% of Western Europeans believe that 2015 will be a year of economic prosperity against 27% in the Americas;
- Three out of five people globally would go to war for their country, with MENA (77%) in stark contrast to Western Europe (25%). Americas is somewhat in the middle with 48% willing to fight for their country and 37% that won't.

A happier world in 2014

As 2014 comes to a close, 70% of respondents to the WIN/Gallup survey say that they are happy, up 10% from 2013. Of the 64,002 people polled just 6% declared to be unhappy, compared to last year's 12%, while those that are neither happy nor unhappy has remained stable, 23% against 26% last year.

Africa appears to be the happiest region in 2014 with 83% of those surveyed across the continent being content, followed by Asia (77%). The Americas come in third with 67% of people being happy

with their lot compared to Oceania (60%), Eastern Europe (58%), MENA (58%) and Western Europe trailing in with 51%. Meanwhile, those from Oceania, MENA and Western Europe are the least happy with 14%, 13% and 11% respectively responding that they are either unhappy or very unhappy.

For the second year running the Columbians (89%) are the happiest in the Americas compared to just 61% in the USA and 64% in Canada.

This year Fiji was the happiest country in the world with 93% of people saying they were either happy or very happy. In contrast the unhappiest country was Iraq where one in three (31%) said that they were either unhappy or very unhappy.

Optimism spreads

From a global perspective, the survey shows that approximately half (53%) of those asked about 2015 think it will be better than 2014, up by 5% from last year. The number of those who think it will be worse has dropped by 5% to 15%.

In the Americas, however, people are not so optimistic, with 42% of people thinking next year will be better. The Columbians and Brazilians, however, buck the trend slightly with 53% and 49% seeing better times ahead.

Africa (75%) and Asia (63%) are the most optimistic about next year with Eastern Europe, MENA and Western Europe proving to be the most pessimistic regions with 28%, 27% and 26% respectively thinking that 2015 will be worse than 2014. Nigeria proved to be the most positive country about 2015 with 85% of respondents thinking it will be better.

Western economies on the slide?

When asked if next year would be one of economic prosperity, 42% of respondents believe it will be better whilst 23% believe it will be one of economic difficulty. Only 27% of people in the Americas, however, saw better economic times ahead, although this was more than double Western Europe's 12%.

Panama (40%) and Peru (36%) are the most bullish about a bright economic outlook in The Americas, while Nigeria (80%) lead the figures across the globe. The most pessimistic countries surveyed were France, Serbia, Greece and Belgium where 57%, 56%, 54% and 54% respectively said that next year

would be one of economic difficulty and only 6%, 15%, 12% and 4% respectively believing it would be a year of economic prosperity.

Would you fight for your country?

In the year that has marked the centenary of the start of the 'Great War' it is noteworthy to see how people responded to the question of whether they would be willing to fight for their country.

Globally, 60% said that they would be willing to take up arms for their country while 27% would not be willing. Western Europe proved the region most reticent to fight for their country with just 25% saying that they would, compared to 48% in the Americas. People from the Arab countries of the Middle East and North Africa are the most likely to be willing to fight for their countries (77%) followed by those living in Asia (71%).

44% of respondents in the USA, 64% in Panama, 61% in Columbia and 30% in Canada said they would fight for their country whereas the figure was just 27% in the UK, 29% in France and 18% in Germany.

Jean-Marc Leger, President of WIN/Gallup International Association, said: "Whilst the outlook for the world's economy remains unpredictable our happiness refuses to wane and remains high across the globe. This year's survey also highlights that many people across the world are increasingly optimistic and believe that 2015 is set to be a good year, although those from the Americas seem to have their doubts."

NOTES FOR EDITORS

Methodology:

The End of Year Survey is an annual tradition initiated by and designed under the chairmanship of Dr. George Gallup in 1977. It is conducted every year since then. This year it was carried out by the WIN/Gallup International Association in 65 countries around the world.

Sample Size and Mode of Field Work:

A total of 64002 persons were interviewed globally. In each country a representative sample of around 1000 men and women was interviewed either face to face (31 countries; n=33862), via telephone (12 countries; n=9784) or online (22 countries; n=20356). Details are attached. The field work was conducted during September 2014 - December 2014. The margin of error for the survey is between 2.14 and 4.45 +3-5% at 95% confidence level.

The global average has been computed according to the share of the covered adult population of the surveyed countries.

About the WIN/Gallup International survey:

WIN/Gallup International is the leading association in market research and polling and is made up of the 75 largest independent market research and polling firms in their respective countries with combined revenue of over €500 million and covering 95% of the world's market.

For more than 60 years WIN/Gallup International Members have demonstrated their expert ability to conduct multi-country surveys on a comparable basis and deliver the highest quality. Their Members are leading national institutes with a profound local knowledge of research methods and techniques, statistical sources, customs and culture differences of its own country and carefully selected by the Association Board. With only one Member agency per country, Members work together on a daily basis to share knowledge, new research techniques and tools, as well as to provide the most appropriate solutions to international research projects and service our clients to the best of our abilities.

The accumulated expertise of the Association is formidable - they have internationally renowned experts in public opinion, Third World issues, advertising, and media research as well as in commercial fields such as IT/telecommunications, healthcare, retail, economics, corporate research and so on. Members are at the leading edge of technical and methodological developments, which have impacted on not only the research industry but also the whole commercial world.

Disclaimer: Gallup International Association or its members are not related to Gallup Inc., headquartered in Washington D.C which is no longer a member of Gallup International Association. Gallup International Association does not accept responsibility for opinion polling other than its own.
