#### **Notes**

1. Considering the special circumstances and the size of the Indian population, support for the field work was provided by our Member Dataprompt International and our friendly company C team Voter;
2. Weighting and Coverage: Weighting to compute Global and Regional averages was done on the basis of adult national population, age 18+ of every country in the sample for standardization across all sampled countries. Details on computations of averages can be made available upon request. The age groups covered in the sample are age 18 and above. In some cases respondents above the age of 65 were not interviewed, the details can be made available. Any interviews below the age of 18 were removed from the sample.
